

CS 61A Discussion 3

Worksheet: Environment Diagrams

Question 1.

Draw the environment diagram that results from executing the code below. Label the parent of every frame you create.

Question 2.

The function returned by `make_counter` keeps its own count. Explain which frame that count lives in, and why it is not discarded.

Question 3.

Rewrite `compose` using a `def` statement instead of a lambda expression. The behaviour must be identical for all inputs.

Solutions are posted Thursday after lecture.
